Internship Student Monthly Evaluation Report

Name & Surname of Learner:	Thabiso Elgin Maladji
Department:	IT Support
Name of Mentor:	Rudzani Emmanuel Mukosi (Senior Business Analyst)
Review Month:	April 2026 To June 2026

Learner to Complete

High Level list of activities completed for the month:

- Participated in the development of the Intern Project Register for Univen interns.
- Took responsibility for compiling and maintaining project documentation, including requirements, progress tracking, and intern details.
- Assisted with front-end development tasks, including layout design and user interface improvements.
- I collaborated with team members to define project scope and structure.
- Attended planning and review meetings to align project goals with stakeholder expectations.
- Researched best practices for documentation and front-end design to improve project quality.
- Provided feedback on usability and functionality during internal testing phases.

Personal Highlights for the month:

- I took ownership of documentation for the Intern Project Register, improving my ability to structure and present project information clearly.
- Gained hands-on experience in front-end development, enhancing my understanding of layout design and user interface functionality.
- Improved collaboration skills by working closely with team members to define project scope and requirements.
- I strengthened my ability to translate business needs into technical documentation.
- Learned how to balance technical tasks with analytical thinking in a real-world project setting.
- Developed a better understanding of how documentation supports project planning and execution

Problem Areas/Challenges:

- Faced initial difficulty in structuring project documentation to meet professional standards.
- Limited experience with front-end frameworks and tools, which slowed down development tasks.
- Balancing documentation responsibilities with front-end support was challenging at times.
- Encountered delays due to unclear project requirements and limited stakeholder feedback.
- I needed more guidance on aligning documentation with technical implementation.
- Struggled with time management during busy phases of the project.

General Comments to discuss with Mentor:

- I would appreciate feedback on the documentation I've prepared for the Intern Project Register, especially regarding structure, clarity, and completeness.
- I'd like to improve my front-end development skills—could we explore best practices or review my current work together?
- I'm interested in learning how to better align documentation with technical implementation and stakeholder expectations.
- I'd appreciate guidance on managing multiple responsibilities effectively, especially when balancing documentation and development tasks.
- I'd like to understand how this project fits into the broader goals of the organization and how I can contribute more strategically

Mentor to Complete:

High Level overall feedback of Intern for the month (e.g., Attendance, completion of work, attitude, work ethic, any positive areas to highlight etc.)

Any areas that need improvement:

- Thabiso has shown consistent attendance and a positive attitude throughout the month. He demonstrates a strong willingness to learn and actively participates in both technical and documentation-related tasks. His work ethic is commendable, and he has made valuable contributions to the Intern Project Register initiative. Thabiso is proactive in seeking feedback and shows initiative in improving his skills, particularly in front-end development and business documentation.

General Comments to discuss with Intern:

- Need further development in identifying and prioritizing critical aspects of business requirements for inclusion in final documentation.
- Should continue improving the ability to illustrate proposed solutions using various diagramming techniques such as:
 - Business Process Mapping
 - Use Case Diagrams
 - Sequence Diagrams
 - Deployment Diagrams
 - Wireframes
- Encouraged to enhance stakeholder engagement during requirements gathering to ensure clarity and completeness.
- We should work on aligning documentation more closely with technical implementation and user needs.

Action plan:

- Continue improving skills in gathering and analysing business requirements.
- Enhance documentation quality—focus on clarity, completeness, and alignment with stakeholder needs.
- Gain proficiency in diagramming tools (Visio, Figma) for:
 - Business Process Mapping
 - Use Case Diagrams
 - Sequence Diagrams
 - Deployment Diagrams
 - Wireframes
- Strengthen front-end development skills through hands-on practice and feedback.
- Participate in the full project lifecycle—from requirements gathering to testing and user demos.
- Act as a liaison between stakeholders and developers to ensure project alignment.
- Seek opportunities to shadow experienced business analysts and join cross-functional projects.

We hereby confirm that a meeting had taken place, and the report was completed, discussed, and agreed upon by both the Mentor and Learner to assist with the development of the Learner's workplace exposure.

Date of Meeting:	20 April 2026
